### Making Connections

PreVisor's assessment content has repeatedly demonstrated its ability to predict performance. Our solutions scientifically measure the effect improved hiring has on key performance indicators such as productivity, attendance, turnover, customer satisfaction and sales. In fact, PreVisor has demonstrated direct ROI for our clients' talent initiatives, showing strong and compelling business results such as:

- Customer Service Representatives who scored higher on the Retention component of the PreVisor solution were more likely to be employed after each 30-day tracking point from 30 days all the way through 210 days.
- Administrative Professionals who scored highest on the Conscientiousness component of the PreVisor solution had better attendance than employees who scored lower.
- Professional Individual Contributors who scored higher on the Job Fit Scale were 87% more likely to be on the job 90 days post-hire.

### Whatever You Need, We Have the Solution

With a vast assessment catalog, decades of ongoing research, and the latest technology in testing, PreVisor's solutions accurately measure critical competencies at every level within an organization. PreVisor assessments can help you understand the landscape of your current workforce, with the results proving useful for hiring the best employees, promoting talent into leadership roles, identifying future leaders for succession planning, and reorganizing the current workforce to be more effective in a new structure with redefined roles.
